**ITEM 700 – FUEL SURCHARGE**

In the event the average monthly price of West Texas Intermediate Crude Oil (WTI) exceeds \$23.00 per barrel using the daily prices as published in the Wall Street Journal, the New York, Susquehanna and Western Railway will have the right to apply a fuel surcharge to all line haul freight charges referencing or subject to this item. The applicable fuel surcharge percentage shall be applied to each shipment having a bill of lading dated on or after the 1<sup>st</sup> day of the second calendar month following the calendar month of a given WTI Average Price calculation.

The fuel surcharge will be 0.4% of the line haul freight charge for every \$1.00 per barrel, or portion thereof, by which the WTI Average Price exceeds \$23.00. The WTI Average Price for a given calendar month will be determined by adding the daily West Texas Intermediate Crude Oil prices published in the Wall Street Journal during a calendar month and dividing the result by the number of days so published in that given month. The result will be rounded to the nearest cent. If the Wall Street Journal ceases publication of the price of West Texas Intermediate Crude Oil, CNYK will employ a suitable substitute source of price or measure.

The fuel surcharge will change monthly per the table below.

**ITEM 725 – MILEAGE BASED FUEL SURCHARGE (MBFSC)**

This Item applies to:

- all regulated common carrier linehaul freight rates existing or established by CNYK on or after April 23, 2007; and
- all linehaul freight rates and charges with respect to exempt traffic, and linehaul freight rates and charges in contracts, private price quotations or other pricing documents, that both reference this publication and are entered into or issued and effective on or after April 23, 2007.

In the event that the monthly average price per gallon of highway diesel fuel (as determined below, the “HDF Average Price”) equals or exceeds 200.0 cents, CNYK will apply a mileage-based fuel surcharge (MBFSC) to the linehaul rates and charges as described above. The mileage-based fuel surcharge will be applied to each qualifying shipment having a bill of lading or other shipping instruction dated on or after the first day of the second calendar month following the calendar month of a given HDF Average Price determination.

The “HDF Average Price” for a month will be the average price for that month of U.S. No. 2 Diesel Retail Sales by All Sellers, as determined and published by the U. S. Department of Energy, Energy Information Administration (“DOE-EIA”). That average price will, in calculating the HDF Average Price, be rounded to the nearest 1/10 of a cent. The fuel surcharge will be 1 cent per mile per railcar for every 4¢ per gallon, or portion thereof, by which the HDF Average Price for the calendar month two months prior to the calendar month of shipment exceeds 199.9 cents.

If DOE-EIA ceases publication of the above information, CNYK will employ a suitable substitute source of price or measure.

The mileage to be applied in calculating the fuel surcharge will be based on rail miles between origin, interchange(s) and destination.

The following table reflects a sampling of the fuel surcharge within the included HDF Average Price ranges.

<b>HDF Average Price</b>	<b>Cents</b>	<b>HDF Average Price</b>	<b>Cents</b>	<b>HDF Average Price</b>	<b>Cents</b>
