ITEM 200 – STORAGE OF EMPTY PRIVATE CARS

Upon written approval from the CNYK's Transportation Department, the CNYK may store empty private marked, customer controlled railcars on CNYK tracks at a location determined by the CNYK.

ITEM 225 – STORAGE OF LOADED PRIVATE CARS

ITEM 300 – SPECIAL TRAIN SERVICE

The CNYK will assess a charge of \$4,200.00 per train for special train movements in addition to applicable freight charges.

Special train movements are all movements of freight cars and industrial switching service that require special handling other than regularly scheduled train service due to movement restrictions on particular freight cars or service required by a customer outside scheduled service times.

ITEM 400 – WEIGHING OF RAIL CARS

The CNYK does not have rail car weighing facilities. If a customer located on the CNYK requests rail car weighing services, the CNYK will assess a charge of \$500.00 per car for weighing, in addition to any fees per CNYK tariffs. Weighing services shall be performed by the New York, Susquehanna & Western Railway. Additional transportation charges may be accessed by the CNYK and/or NYSW.

Item 425 – OVERLOADED RAIL CARS

The CNYK will assess a charge of \$750.00 per car on each car that is determined to be overloaded on the CNYK. This charge includes the initial weighing of the car.

The customer is responsible for any damage to the railcar caused by overloading of the railcar.

Cars found to be overloaded must be partially unloaded to the weight limit of the railcar by the customer at the customer's expense where placed by the CNYK for offloading. Demurrage charges will be assessed on the overloaded car from the day the shipper is notified of the overloaded car until the car is accepted by the CNYK as being within the lading limits of the car. No demurrage 'free' days will be allowed on overloaded cars.

If the CNYK Transportation Department determines that car can be returned to the shipping point for offloading of the excessive lading the switching charge contained in Item 100 of this tariff will be accessed in addition to the charges in this item.

Overloaded cars must be reweighed after lading removal and before being accepted by the CNYK for loaded movement. Weighing charges contained in Item 400 of this tariff will be accessed if the CNYK reweighs the car.

ITEM 500 – CARS ORDERED AND NOT USED

Mileage will be computed from interchange to the CNYK to interchange from the CNYK. Storage charges, per Item 200 will be assessed in addition to charges for movement of empty private cars.

Private car mileage allowances will not be paid on cars moving under provisions of this item.

ITEM 550 – RETURN OF PALLETS, PLATFORMS, SKIDS, CONTAINERS, CARRIERS OR OTHER SHIPPING DEVICES

The CNYK will not provide free return, non-revenue movement, of pallets, platforms, skids, containers, carriers or other shipping devices unless specifically provided for in individual pricing documents and/or contracts.

ITEM 575 – CARS INTERCHANGED IN ERROR

The CNYK will charge \$350 per car for cars interchanged to the CNYK in error by a connecting railroad. The charge will be billed to the railroad delivering the car in error to the CNYK.

ITEM 600 – FUEL SURCHARGE

In the event the average monthly price of West Texas Intermediate Crude Oil (WTI) exceeds \$23.00 per barrel using the daily prices as published in the Wall Street Journal, the New York, Susquehanna and Western Railway will have the right to apply a fuel surcharge to all line haul freight charges referencing or subject to this item. The applicable fuel surcharge percentage shall be applied to each shipment having a bill of lading dated on or after the 1st day of the second calendar month following the calendar month of a given WTI Average Price calculation.

The fuel surcharge will be 0.4% of the line haul freight charge for every \$1.00 per barrel, or portion thereof, by which the WTI Average Price exceeds \$23.00. The WTI Average Price for a given calendar month will be determined by adding the daily West Texas Intermediate Crude Oil prices published in the Wall Street Journal during a calendar month, and dividing the result by the number of days so published in that given month. The result will be rounded to the nearest cent. If the Wall Street Journal ceases publication of the price of West Texas Intermediate Crude Oil, CNYK will employ a suitable substitute source of price or measure.

The fuel surcharge will change monthly per the table below.

ITEM 700 – MILEAGE BASED FUEL SURCHARGE (MBFSC)

This Item applies to:

- all regulated common carrier linehaul freight rates existing or established by CNYK on or after April 23, 2007; and
- all linehaul freight rates and charges with respect to exempt traffic, and linehaul freight rates and charges in contracts, private price quotations or other pricing documents, that both reference this publication and are entered into or issued and effective on or after April 23, 2007.

In the event that the monthly average price per gallon of highway diesel fuel (as determined below, the “HDF Average Price”) equals or exceeds 200.0 cents, CNYK will apply a mileage-based fuel surcharge (MBFSC) to the linehaul rates and charges as described above. The mileage based fuel surcharge will be applied to each qualifying shipment having a bill of lading or other shipping instruction dated on or after the first day of the second calendar month following the calendar month of a given HDF Average Price determination.

The “HDF Average Price” for a month will be the average price for that month of U.S. No. 2 Diesel Retail Sales by All Sellers, as determined and published by the U. S. Department of Energy, Energy Information Administration (“DOE-EIA”). That average price will, in calculating the HDF Average Price, be rounded to the nearest 1/10 of a cent. The fuel surcharge will be 1 cent per mile per railcar for every 4¢ per gallon, or portion thereof, by which the HDF Average Price for the calendar month two months prior to the calendar month of shipment exceeds 199.9 cents.

If DOE-EIA ceases publication of the above information, CNYK will employ a suitable substitute source of price or measure.

The mileage to be applied in calculating the fuel surcharge will be based on rail miles between origin, interchange(s) and destination.

The following table reflects a sampling of the fuel surcharge within the included HDF Average Price ranges.

HDF Average Price	Cents	HDF Average Price	Cents	HDF Average Price	Cents
Cents Per Gallon	Per Mile	Cents Per Gallon	Per Mile	Cents Per Gallon	Per Mile
